

ROLL OUT THE GREEN CARPET!

The Earth and the
Animals Deserve
the BEST

*In addition to your
membership support, you can:*

- ✓ Choose local, pasture-based animal products at your grocery store or farmers market.
- ✓ Ask your grocer or farmer about how your meat and dairy animals were raised.
- ✓ Patronize restaurants that source their ingredients from pasture-based and pesticide-free farms.
- ✓ Visit a nearby pasture-based farm. Make it a family outing!
- ✓ Attend or host a Grazing Ambassadors talk to learn how grass-based farming affects you.

November 2013

manage grass and animals and
where to find local grass-fed
farms and products!*

EARTH FRIENDLY FARMING
GRASSWORKS
Your Grazing Resource!

Welcome to GrassWorks Inc.

Become a member today!

YOUR TAX-DEDUCTIBLE GIFT WILL HELP US TO:

Educate and mobilize farmers and citizens to advocate for grass-based farming practices, policies, and products.

Design and implement practical on-farm research in cooperation with partnering farmers, non-profit, and government organizations and disseminate results.

Build community through our grazing conference, regional pasture-walks, Grazing Ambassador program, and our website.

Join the community of producers and citizen supporters who are keeping small and mid-sized farms in Wisconsin profitable through managed grazing.

Managed grazing is an efficient low-cost farming method that builds soil, keeps nutrients in place, protects air and water quality and provides critical wildlife habitat. Livestock harvest the crop and spread their own nutrients back on the land, reducing the need for chemical fertilizers and fossil fuels. Animals are healthy and produce meat, milk, and eggs with superior taste and nutrition. Grazing farms provide a good living for family farmers while making rural communities stronger.
